

Abolishments by postcode

FY2023-2024

Each financial year we are required to publish the number of permanent gas service removals by postcode and in total for the business. These are called abolishments.

The below table provides the data for the latest Financial Year.

An abolishment is the permanent removal of a gas service connection by cutting and capping of the gas service within the street and removal of all above ground assets (including the meter); or by removing a meter and disconnecting the service line to prevent the withdrawal of gas at the distribution delivery point.

We are required to abolish a small customer's connection to our distribution system: either at the written direction of a retailer; or where we are directed to do so under the Gas Safety Act 1997.

Further information can [be found here](#).

Post Code	Number	Post Code	Number	Post Code	Number
3000	12	3201	11	3825	19
